

CASE STUDY: MULTI-UNIT

ASSISTED LIVING

Op2mize Energy created an energy buying strategy for an assisted living client whose facility consists of 3 buildings and 181,987 sf. For both electricity and natural gas, Op2mize developed a strategy that matched the client's business plan and risk appetite. The results:

- Fixed rates less than half the 2014 winter utility rate spikes
- Budget certainty
- More favorable contract terms
