

CASE STUDY: PORTFOLIO

REAL ESTATE PORTFOLIO

An owner/manager of a portfolio of millions of square feet, primarily in Chicago, IL had several properties that individually did not provide much purchasing power. While they wished to find maximum savings, it was imperative to the client that each property remain contractually independent. Op2mize was able to provide:

- Significantly reduced electric rates with the aggregate purchasing power of 11 properties, keeping each contracted under a separate legal entity name
- Estimated savings of \$84,000 over the life of the contract
